For Immediate Release  
April 21, 2015

### **Nevada's Sub-State Unemployment Rates Continue to Fall Year over Year**

Carson City, NV —The unemployment rate in Las Vegas remained at 7.2 percent (not seasonally adjusted) in March, but is down 1.2 percentage points from last year. The Reno/Sparks area unemployment rate is down two tenths of a point over the month, to 6.9 percent, and is down 1.5 percentage points over the year. The Carson City area experienced the largest year-over-year decline of 1.8 percentage points, registering at 7.8 percent.

All three of Nevada's population centers gained employment on a year-over-year basis, said Bill Anderson, chief economist for Nevada's Department of Employment, Training and Rehabilitation. Las Vegas experienced the highest nominal growth in March, up 23,600 jobs, an increase of 2.7 percent, relative to March 2014. Reno/Sparks added 5,800 jobs to payrolls (+2.9 percent). Carson City added 200 jobs, up 0.7 percent. Statewide, job numbers increased 2.8 percent over-the-year, adding 34,100 jobs.

“Looking at historical employment trends, evidence of Nevada's economic recovery is readily apparent, especially in the Las Vegas and Reno metros,” Anderson said. “Also of note, since March 2010, as the recession was bottoming out, the unemployment rate has decreased in every county, signifying the economy is regaining strength.”

## NEVADA SUB-STATE LABOR MARKET OVERVIEW March 2015

Statewide, employment fell by a seasonally adjusted 700 in March, relative to February. Reno/Sparks, the only metropolitan statistical area (MSA) to add jobs this month, had a seasonally adjusted increase of 1,300 jobs, the result of 1,400 jobs added to payrolls (not adjusted for seasonality), when only 100 jobs were expected. In Las Vegas, we expected payrolls to increase by 5,800 this month, but only 4,500 jobs were actually added, leading to a seasonally adjusted decrease of 1,300 jobs. A similar pattern unfolded in Carson City. Payrolls were expected to increase by 200, but only 100 jobs were actually added, leading to a seasonally adjusted decrease of 100 jobs.

However, all three of Nevada's population centers gained employment on a year-over-year basis. Las Vegas was home to the highest nominal growth this month, up 23,600 jobs, an increase of 2.7 percent, relative to March 2014. Reno/Sparks added 5,800 jobs to payrolls (+2.9 percent). Finally, Carson City added 200 jobs, up 0.7 percent. Statewide, job numbers increased 2.8 percent over-the-year, adding 34,100 jobs.

Sub-State Nonfarm Jobs: Feb. - Mar. Change			
	Unadjusted Change	Expected Seasonal Movement	Seasonally Adjusted Change
Las Vegas	4,500	5,800	-1,300
Reno	1,400	100	1,300
Carson City	100	200	-100

Looking at historical employment trends, evidence of Nevada's economic recovery is readily apparent, especially in the Las Vegas and Reno metros. For instance, between 2010 and 2014, the Las Vegas metro added 80,000 new private sector jobs. So far this year, job levels are trending up another 27,300 on top of that. The Reno metro also experienced a significant amount of job growth in the private sector, adding 12,400 jobs between 2010 and 2014. During the first three months of 2015, job levels are continuing their positive trend, increasing by 5,900 jobs in addition to previous job growth. The Carson City metro gained only 300 jobs between 2010 and 2014; however, jobs levels are trending up an additional 600 jobs so far in 2015. All told 99,000 jobs were added Statewide between 2010 and 2014. In 2015 thus far, job levels are trending up another 39,000

February, at 7.2 percent, but is down 1.2 percentage points from last year. The Reno/Sparks area is down two tenths of a point over the month, to 6.9 percent, and is down 1.5 percentage points over the year. The Carson City MSA was home to the largest year-over-year decline of 1.8 percentage points, for an unemployment rate of 7.8 percent, down 0.4 percentage points relative to February.

The unemployment rate in each of the State's MSAs varied in March, both over the month and on a year-over-year basis<sup>1</sup>. The rate in Las Vegas held steady relative to

In March, county unemployment rates ranged from 3.6 percent in Esmeralda County to 11.6 percent in Mineral County, the only county with a double-digit rate. Besides Esmeralda, relatively low unemployment rates are also found in Elko (5.5 percent), and Eureka (5.6 percent). The highest unemployment rates, aside from Mineral, belong to Lyon (9.9 percent), and Nye (8.9 percent). As a point of reference, in March 2010, 13 counties had unemployment rates in excess of ten percent.

<sup>1</sup> The State's seasonally adjusted unemployment rate is 7.1 percent in March, unchanged from February and down from 8.2 percent in March 2014. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate – 7.2 percent in March, down from 7.3 percent in February and down from 8.5 percent in March 2014.

In fact, since March 2010, as the recession was bottoming out, the unemployment rate has decreased in every county, signifying the economy is regaining strength. During the past five years, the four most notable declines belong to Storey, Lyon, Nye, and Esmeralda counties. From March 2010 to March 2015, Storey County had the greatest decline in unemployment, dropping from 17.7 percent to 7.7 percent (down ten percentage points). Lyon County shed nearly half of its unemployment rate, decreasing 8.6 percentage points from an unemployment rate of 18.5 percent in March 2010 to 9.9 percent in March 2015. Nye County experienced an 8.2 percentage point decrease in the unemployment rate over the last five years, decreasing from 17.1 percent to 8.9 percent. Rounding out the top four, Esmeralda County dropped 6.7 percentage points from an unemployment rate of 10.3 percent to a rate of 3.6 percent. In total, the Statewide unemployment rate dropped from 13.6 percent to 7.2 percent (not seasonally adjusted) during this period, an overall decrease of 6.4 percentage points.
