DETR's RESEARCH AND ANALYSIS BUREAU
CHIEF ECONOMIST BILL ANDERSON

PRESS RELEASE

For Immediate Release
May 24, 2016

Nevada's Metro Area Unemployment Rates Down Year-Over-Year

Clark County Regains All Jobs Lost during the Recession

CARSON CITY, NV —Nevada's unemployment rates in April varied on a month-over-month basis, but decreased year-over-year. The rate in Las Vegas is up 0.1 percentage point from March, at 6.1 percent, and is down 0.8 percentage points from last year, said Bill Anderson, chief economist for Nevada's Department of Employment, Training and Rehabilitation. Over-the-year, the rate in the Reno/Sparks area decreased 1.2 percentage points, to 5.4 percent, and is down 0.1 percentage point over-the-month. The Carson City MSA rate is down 0.1 percentage point relative to last month, and declined 0.8 percentage point over-the-year, with an unemployment rate of 6.7 percent.

"Nevada's largest population centers gained employment on a year-over-year basis, pointing to the continued improvement in the Silver State's economy statewide," Anderson said. "The fact that the rate rose slightly in Las Vegas in April is not cause for concern. The annual measures of unemployment are more indicative of the state of the economy.

Most importantly, job readings in April show that Clark County has regained all of the 134,300 jobs lost, from its peak in 2007 to the trough in 2010. "Relative to April 2015, Las Vegas experienced the highest nominal job growth, adding 23,600 jobs, an increase of 2.6 percent. In the state as a whole, job numbers also increased 2.6 percent year-over-year, adding a seasonally adjusted 32,900 jobs.

As previously reported, the statewide unemployment rate remained at 5.8 percent in April.

NEVADA SUB-STATE LABOR MARKET OVERVIEW

April 2016

In April, Statewide employment growth was relatively mild, increasing by a seasonally adjusted 400, relative to March. This translated into mixed results across the Silver State's metropolitan statistical areas (MSAs). Las Vegas, the only metro area to realize a seasonally adjusted decrease this month, is down 100 jobs; the result of a 3,800 job increase in payrolls (not adjusted for seasonality), when an increase of 3,900 jobs was expected. In Reno/Sparks, we expected payrolls to increase by 1,400 jobs; however, jobs actually increased by 2,700,

	Unadjusted Change	Expected Seasonal Movement	Seasonally Adjusted Change
Las Vegas	3,800	3,900	-100
Reno	2,700	1,400	1,300
Carson City	200	0	200

leading to a seasonally adjusted increase of 1,300 jobs. Finally, Carson City job numbers were expected to be stagnant, but actually realized an increase of 200 jobs. Consequently, there was a seasonally adjusted increase of 200 jobs this month in the State capital.

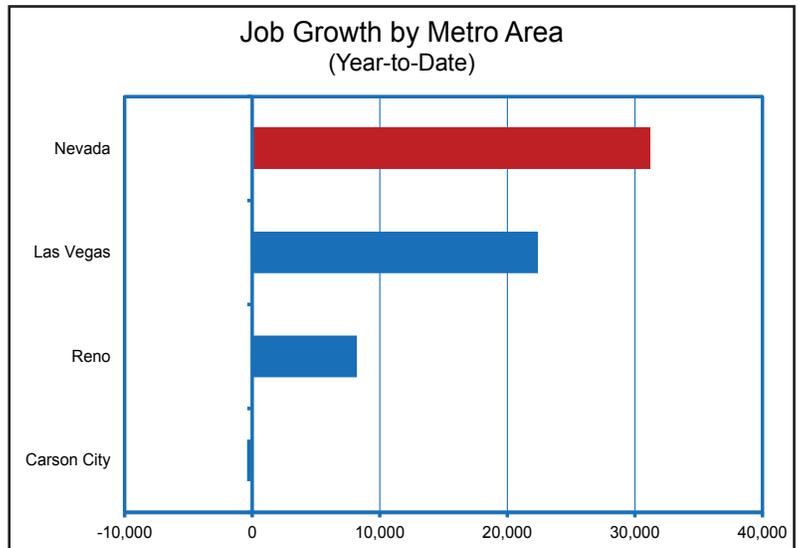

This month, the State's largest population centers gained employment on a year-over-year basis. Las Vegas was home to the highest nominal growth, 23,600 jobs, an increase of 2.6 percent, relative to April 2015. Specifically, goods-producing industries added 6,600 jobs and service providers added 14,000.¹ Perhaps most importantly, job readings in April show that Clark County has regained all of the jobs lost

¹ References to total MSA employment are adjusted for seasonality, whereas references to goods-producing and service-providing industries are not.

during the recession. Employment peaked at 932,500 in 2007. Currently, job levels total 934,700. From the peak in 2007, to the trough in 2010, 134,300 jobs were lost in Las Vegas.

In Reno/Sparks, service providers increased significantly, with a year-over-year increase of 7,600 jobs, and goods-producing employment added 900 jobs to payrolls. All told, growth in the Reno/Sparks area totaled 9,200 jobs, up 4.4 percent from April last year. Carson City was the only MSA to hold steady year-over-year. In the State as a whole, job numbers increased 2.6 percent year-over-year, adding a seasonally adjusted 32,900 jobs.

Last month, we analyzed metro area employment over time utilizing timely job estimates generated via the Current Employment Statistics (CES) Program. With data from the Quarterly Census of Employment and Wages, which provides a complete count of employment (but

less timely) based on information provided by employers covered under the State's Unemployment Insurance System, this month, we assess employment growth for all counties. Statewide, job levels peaked in 2007. Hence, an analysis covering the period since then sheds light the relative performance of all 17 counties over the course of the business cycle, through 2015:IIIQ, the most recent information available.

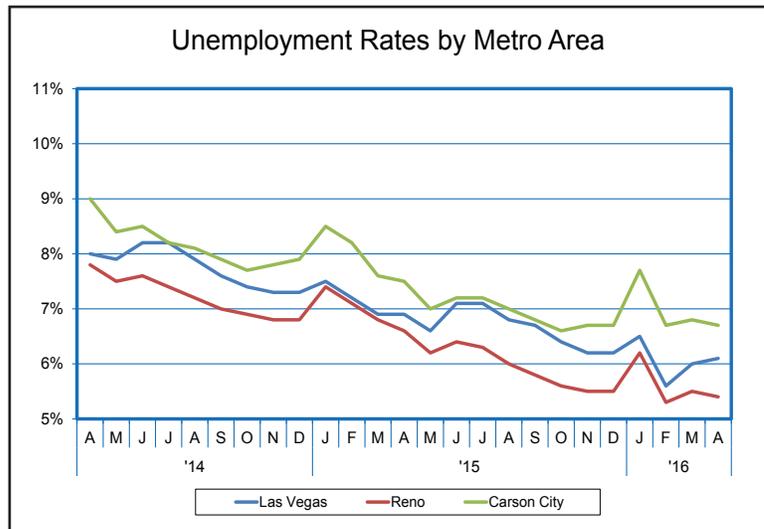

Online Job Posting Activity by County			
	April Online Job Postings		Change
	2016	2015	
Washoe	3,943	3,121	822
Clark	13,435	12,842	593
Carson City	791	623	168
Douglas	270	209	61
Elko	468	430	38
Humboldt	163	134	29
Lyon	221	204	17
Churchill	198	184	14
Storey	25	11	14
White Pine	124	112	12
Mineral	59	50	9
Lander	23	25	-2
Esmeralda	12	15	-3
Pershing	23	27	-4
Eureka	9	15	-6
Lincoln	29	46	-17
Nye	155	208	-53

Nevada's rural counties experienced the largest gains in total employment since the third quarter of 2007. Specifically, the counties with the highest growth are Storey and Esmeralda, both with gains in excess of 75 percent. Lander, with a gain of nearly 25 percent, was the third-fastest growing county in the State.

Although Nevada's labor market is in recovery, ten of the Silver State's 17 counties have yet to regain all of the jobs lost during the most recent recession, at least based upon information through 2015:IIIQ, including the State's metro areas. Clark employment is down only 11,000 jobs, or -1.2 percent, from pre-recession levels.² Washoe has a

² While Current Employment Statistics numbers indicate Las Vegas employment surpassed the all-time high in March and April, QCEW numbers are slightly lagged, and still show a contraction in payrolls between the pre-recessionary high in 2007, and the most recent QCEW data (2015:IIIQ).

slightly larger gap in employment over the period, with a disparity of 16,700 jobs, or -7.6 percent. As of 2015:IIIQ, payrolls in the State capital are still down 11.9 percent, a total of 3,800 jobs less than 2007:IIIQ. The counties with the most pronounced percentage declines in employment are Mineral (-30.4 percent), Lyon (-14.7 percent), and Nye (-14.3 percent). Overall, State employment remains 2.9 percent below the pre-recessionary high, according to QCEW information.

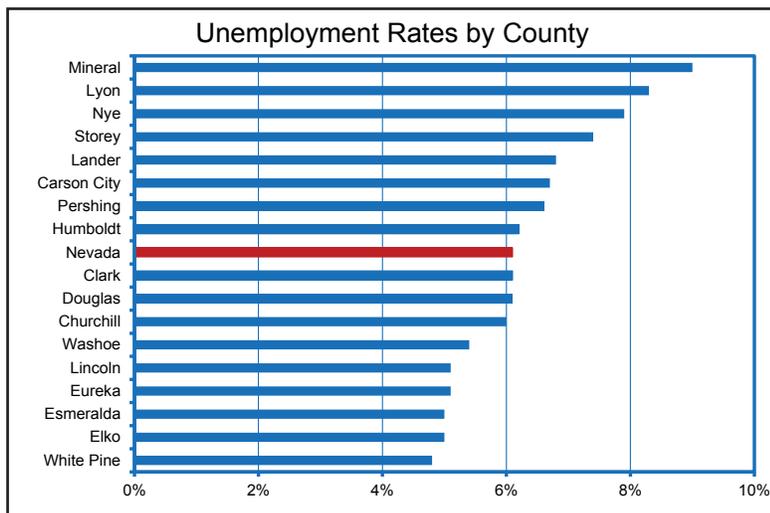

Over-the-year, online job posting activity³ is up in 11 of 17 counties in April. Washoe job postings increased more than any other county (+800) at 3,900 ads, up from 3,100 postings a year ago. Clark also realized significant growth in postings, with an increase of 600 ads, totaling 13,400 postings. Nye, Lincoln, Eureka, Pershing, Esmeralda, and Lander realized over-the-year declines in job postings. Nye declined more than any other county, with 50 less postings than in April last year.

year.⁴ The rate in Las Vegas is up 0.1 percentage point from March, at 6.1 percent, and is down 0.8 percentage points from last year. Over-the-year, the rate in the Reno/Sparks area decreased 1.2 percentage points, to 5.4 percent, and is down 0.1 percentage point over-the-month. The Carson City MSA rate is down 0.1 percentage point relative to last month, and declined 0.8 percentage point over-the-year, with an unemployment rate of 6.7 percent.

This month, the unemployment rates in the State's metros varied on a month-over-month basis but, decreased year-over-

Unemployment rates remain below nine percent in 16 of the Silver State's 17 counties, in April. Rates ranged from 4.8 percent in White Pine to nine percent in Mineral. In addition to White Pine, relatively low unemployment rates are also found in Elko and Esmeralda, both with a rate of five percent. The highest unemployment rates, other than Mineral, belong to Lyon (8.3 percent) and Nye (7.9 percent).

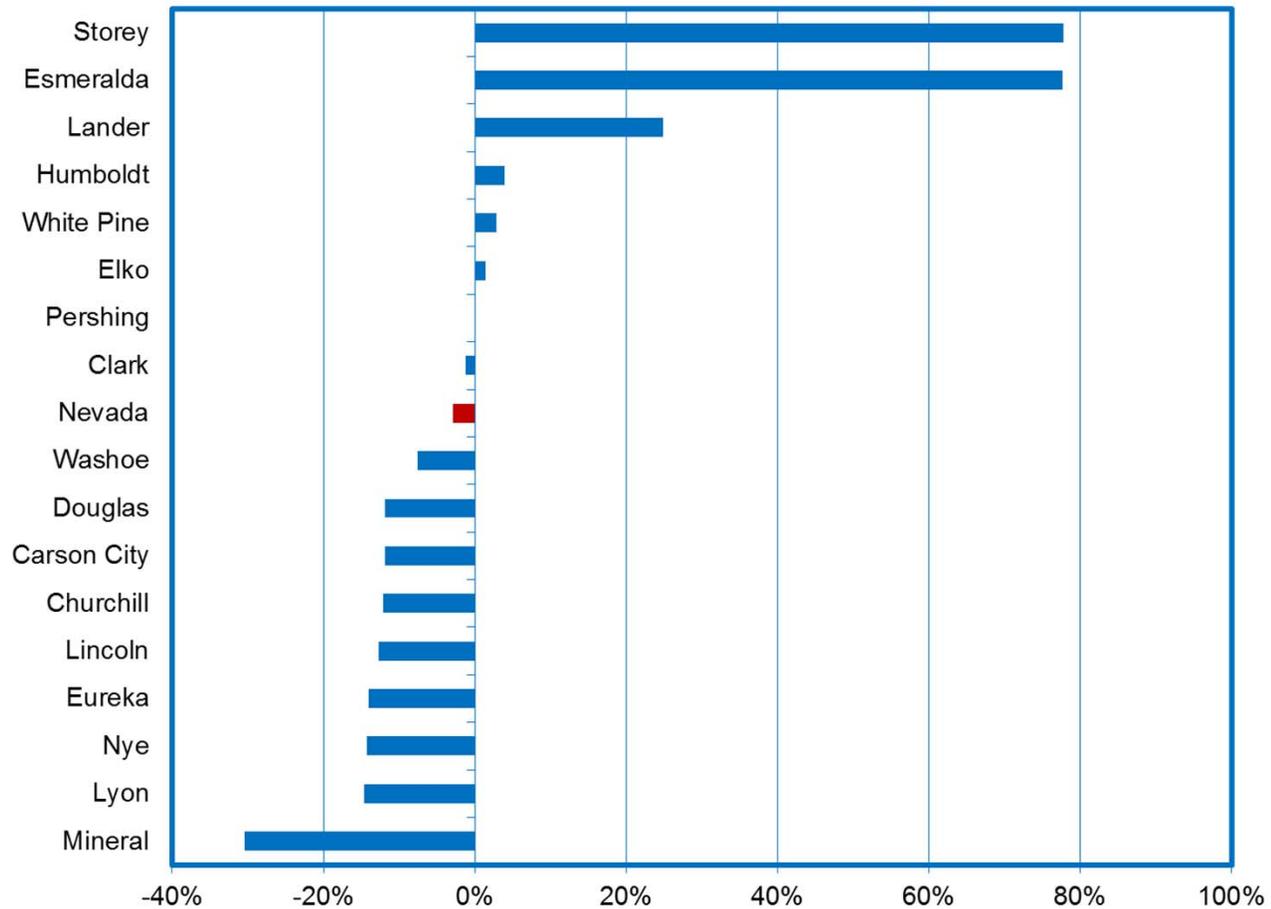

³ The Department of Employment, Training, and Rehabilitation is a client of Burning Glass Technologies. Among other things, Burning Glass has developed a number of tools to assist a variety of workforce development entities in efforts to match workers with jobs. Online job posting information is available via their Labor Insight tool.

⁴ The State's seasonally adjusted unemployment rate is 5.8 percent in April, unchanged from March and down from 6.9 percent in April 2015. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate - 6.1 percent in April, up from 5.9 percent in March and down from 6.9 percent in April 2015.
