DETR's RESEARCH AND ANALYSIS BUREAU
CHIEF ECONOMIST BILL ANDERSON

PRESS RELEASE

For Immediate Release
September 20, 2016

Metro Area Unemployment Rates Down in August

CARSON CITY —Unemployment rates fell in all of Nevada's metro areas in August. The rates in Las Vegas and Carson City registered at 6 percent, while the rate in Reno is 4.9 percent.

“The labor market in the Silver State continues to show positive signs of recovery,” said Bill Anderson chief economist for Nevada's Department of Employment, Training and Rehabilitation. “Unemployment rates are down across all 17 counties in Nevada, while we continue to see employers adding jobs throughout the state.”

Las Vegas employment increased by 5,300 jobs and Reno/Sparks gained a seasonally adjusted 1,000 jobs. This growth translates to 26,400 new jobs in Las Vegas year over year. Reno/Sparks employment grew at 5.4 percent over the year, amounting to 11,400 new jobs.

NEVADA SUB-STATE LABOR MARKET OVERVIEW

August 2016

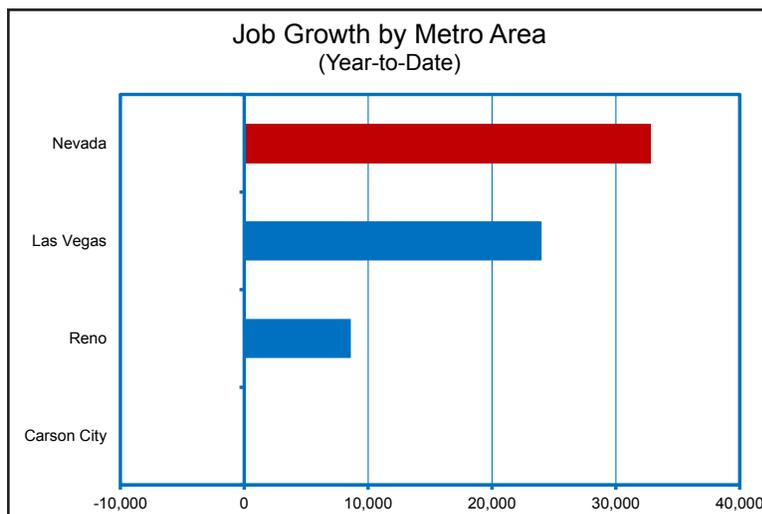

Nevada realized encouraging employment growth in August, with a seasonally adjusted gain of 4,800 jobs Statewide from July. This growth was concentrated in the two largest metropolitan statistical areas (MSAs), Las Vegas and Reno/Sparks. Las Vegas employment increased by 5,300 jobs, the result of a 5,500 increase in payrolls (not adjusted for seasonality) when an increase of 200 jobs was expected. Reno/Sparks gained a seasonally adjusted 1,000 jobs after experiencing a nominal jump in payrolls of 1,800, when only 800 new jobs were expected. In Carson City, payrolls decreased by 200 when the expected sea-

Nevada Nonfarm Jobs: July - August Change

	Unadjusted Change	Expected Seasonal Movement	Seasonally Adjusted Change
Las Vegas	5,500	200	5,300
Reno	1,800	800	1,000
Carson City	-200	-100	-100

sonal change was a decrease of 100. As a result, the State capital employment levels have a seasonally adjusted loss of 100 jobs.

Year-over-year employment growth was positive for all three of the Silver State's largest population centers. Las Vegas grew at 2.9 percent, the same rate as the State as a whole. This growth translates to 26,400 new jobs in Las Vegas since August of last year. Specifically, goods-producing industries added 7,200 jobs and service providers added 19,100¹. Reno/Sparks employment grew at 5.4 percent over the year, amounting to 11,400 new jobs. Service providers added 10,200 jobs in the area and goods-producing industries increased payrolls by 900. Finally, Carson City added 300

¹ References to total MSA employment are adjusted for seasonality, whereas references to goods-producing and service-providing industries are not.

jobs since August 2015, a growth rate of 1.1 percent. Service-providing industries gained 600 jobs over the period while goods-producing industries lost 200. Statewide, 37,200 new jobs were gained over the year.

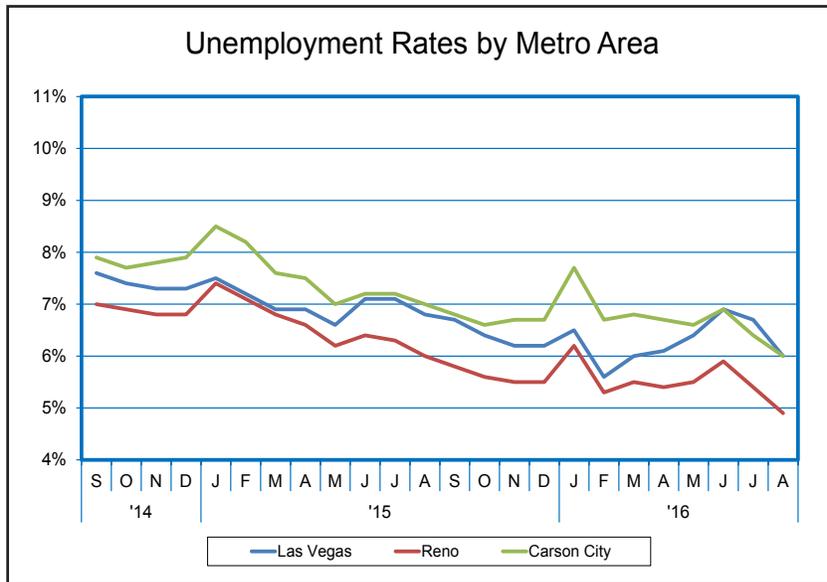

While monthly employment numbers come from the Current Employment Statistics program, the Quarterly Census of Employment and Wages (QCEW) provides a more comprehensive, but less timely, count of employment and wage data for workers covered by Nevada unemployment insurance laws. County-level QCEW information for this year's first quarter shows that job growth ranges from -7.1 percent (Lander) to 33.1 percent (Mineral). Mineral's high growth rate is due in part to the area's relatively low overall population, and represents an increase of 390 jobs over the year. Statewide, job growth came in at three percent. Eleven of the 17 counties experienced growth over the past year, while six (Lander, Humboldt, White Pine, Pershing, Lyon, and Esmeralda) experienced a decrease in employment. All three of the Silver State's major population centers realized employment gains during the time period. Job growth in Clark County is just slightly below the State average, at 2.9 percent. Washoe County employment experienced faster growth than

the Silver State, at 4.6 percent.

Data from QCEW also show that Nevada had an average weekly wage of \$875 during the first quarter of 2016, an increase of 1.1 percent from a year earlier. Across the counties, weekly wages range from \$650 (Lincoln) to \$2,200 (Eureka). Besides Eureka, the only counties with payrolls above \$1,000 per week are Lander, Humboldt, and White Pine at \$1,600, \$1,100, and \$1,000 respectively. This can be attributed to the high concentration of gold ore mining jobs in these counties. Counties with the highest

growth rates from a year earlier were Storey (7.4 percent), Lander (2.8 percent), and Eureka (2.5 percent). The lowest growth rates were found in Pershing (-4.2 percent), Carson (-3.3 percent), and White Pine (-2.8 percent). As for Nevada's major population centers, Clark County weekly wages increased 1.5 percent from 2015:Q1, to \$870, just below the State average. Carson City wages fell to \$850, while Washoe County grew by 0.4 percent (also at \$850), right below the average weekly wage for the Silver State as a whole.

The Census Bureau's Local Employment Dynamics (LED) Program offers insight into underlying trends by producing a collection of enhanced labor market statistics. Among other things, LED information allows for a comparison of new-hire wages to average wages. Statewide, newly hired workers tend to earn about two-thirds of the average for all workers. Within Nevada, new-hire earnings in every county are below the overall average. Lincoln has the lowest ratio, with newly hired workers earning only 60 percent of the overall average wage. The highest new-hire earnings are found in Eureka, at \$5,400 per month. This is about 90 percent of the overall average of \$6,100/month. All told, new-hire earnings in ten counties slightly exceed 70 percent of the overall average. Taken as

percent, down 0.4 and 0.7 percentage points, respectively, from July. Carson City unemployment is down one percentage point from this time last year, while Las Vegas unemployment has decreased 0.8 percentage point over the same period. Reno/Sparks unemployment is down 0.5 percentage point from last month, at 4.9 percent, and down 1.1 percentage points from August of 2015, making this month the first time the rate has fallen below five percent since the end of 2007.

a whole, these findings support the fact that longer-term employees, as a group, are paid more than those with less seniority on the job.

This month, initial claims for unemployment insurance on a county level largely reflect the declining trend seen statewide. Through August, 14 of Nevada's 17 counties have seen year-to-date declines in initial claims. Nominally, the largest declines have unsurprisingly been in Clark (-5,500) and Washoe (-1,700), though Churchill, Elko, and Lyon have all experienced year-to-date declines of more than 11 percent. Only Esmeralda and Pershing have seen minimal year-to-date increases in the number of initial claims.

In August, unemployment rates were down in all of the State's major population centers, both on a month-over-month basis and over the year². Carson City and Las Vegas both were home to unemployment rates of six

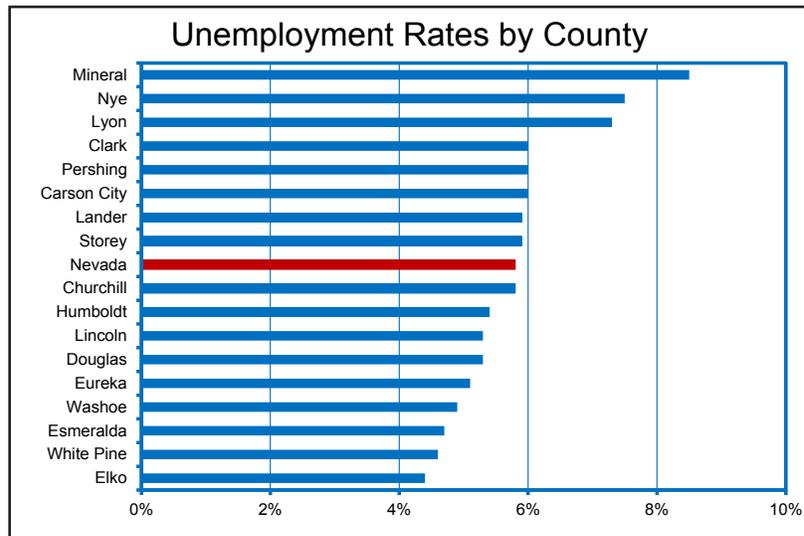

² The State's seasonally adjusted unemployment rate is 6.3 percent in August, down from 6.5 percent in July and down from 6.6 percent in August 2015. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate - 5.8 percent in August, down from 6.5 percent in July and down from 6.7 percent in August 2015.

Unemployment rates are down across all 17 counties in Nevada this month, from a low of 4.4 percent in Elko to a high of 8.5 percent in Mineral. Esmeralda, Mineral, and Lander experienced the largest month-over-

	August 2016 (Year-to-Date)		Change

Esmeralda	26	22	4
Pershing	102	93	9

*County level totals are not directly comparable to Statewide monthly totals due to reporting differences.

month drops in unemployment, each decreasing the jobless rate by one percentage point or more in August. Esmeralda, with the largest drop of 1.6 percentage points, joins Elko and White Pine counties with the lowest unemployment rates in the State. Mineral experienced the second largest drop in unemployment since July but continues to have the highest rate overall, and is also joined by Nye and Lyon with unemployment rates over seven percent.

Year-to-date, online job posting activity³ is up in 16 of 17 counties. Clark County continues to experience the largest increase with 103,200 total jobs ads this year, a net gain of 5,600 ads over this time last year. Washoe also realized significant growth in postings, with a year-to-date increase of 4,600 ads, a total of 27,400 postings. Carson City has shown impressive growth with

1,500 more job ads this year than in 2015, bringing the State capital's total to 5,400 ads. Pershing is the only county to receive less job ads year-to-date than in 2015, with 200 posts, a deficit of 20 compared to last year.
