

Nevada's UI Modernization Initiative: UInv

Presented by: Dave Haws, DETR IDP

What is UInv?

- Replacement and modernization of DETR's 30+ year old legacy UI application
 - Originally developed in the 70's and then cloned for multiple states
 - The system is no longer able to handle US DOL and Nevada UI business requirements
 - The legacy system does not facilitate online sharing and processing of UI information
 - Too much manual effort required to process UI

How will it help?

- Improved UI Features, Functions and Technologies
 - More direct access to accounts and account information
 - Online Internet access to UI reporting, payment and claim information
 - Ability to update and communicate information directly by employers, claimants and agents
 - Improved methods for tracking and resolving UI issues

UInv Project Info

- The project is federally funded and was competitively bid
- The project is currently underway
 - UInv release 1, document imaging, is completed
 - Next up, the claimant Internet portal
 - The last phase, the employer Internet portal and UI backend accounting, is planned for early 2013
- Over 100 persons working on the project including DETR SMEs, DETR IT, and Vendor Staff

UInv Q&A
