Social Security Administration (SSA) Disability Determination Services (DDS) Consultative Examination Providers

We are looking for talented medical professionals to add a new path to their distinguished careers, touching the lives of people nationwide performing Consultative Examinations (CE). A CE is a physical or mental examination purchased by the DDS for a person who has applied for disability benefits.

[Doctors, Psychologists, Psychiatrists, and Speech Pathologists] are especially needed to perform CEs for the Nevada DDS.

We purchase CEs only from qualified medical sources. By “qualified”, we mean that the medical source must be currently licensed in the State and have the training and experience to perform the type of exam or test we request.

Benefits for CE Providers:

- One time exam in your office or geographical area
- No treatment involved
- Flexible hours
- Prompt payment
- Learn SSA’s disability program and evidence requirements
- Electronic option for submitting report
- Not responsible for final disability determination
